WORK EXPERIENCE

Software Engineer

Jan 2024 – Present

DoorFeed — *London*

- Redesigned the company's flagship Investment Portal, delivering a full-stack solution that contributed to achieving significant growth milestones.
- Engineered high-performance data visualisation components using React and Highcharts, enhancing key investment metrics presentation.
- Implemented a real estate investment Simulator with complex visualisations and strategy testing capabilities, improving investor decision-making.
- Developed a property financial forecasting feature generating 20+ data points per forecast quarter, resulting in accurate cash flow and P&L statements.
- Translated complex Excel models into scalable code using Test-Driven Development (TDD), ensuring high-quality software delivery.
- Mentored teammates and conducted technical interviews, contributing to team growth and knowledge sharing

Software Engineer

Apr 2021 – Sep 2023

Upstreet — *Sydney*

- Architected and deployed a TypeScript/Next.js multi-tenant platform serving 500+ employees across 5 organisations
- Engineered bulk upload functionality, achieving 90% efficiency improvement in reward administration
- Spearheaded development of a React/TypeScript platform serving 23K+ users with Material UI
- Developed robust TypeScript APIs using GCP Cloud Functions and Firebase, implementing TDD practices
- Championed technical knowledge sharing and innovation initiatives to enhance team productivity

PROJECTS

Spotify Judger AI Chatbot (spotify-judger.vercel.app)

- Developed an interactive AI chatbot using Next.js, Tailwind CSS, and OpenAI's Chat Completion API
- Provides a playful and engaging experience for users to evaluate their music preferences
- Integrated real-time music data from the Spotify Web API
